It seems every time you turn around, a new case has hit the market. This is actually a good thing as it means with a little bit of looking you should be able to find one to suit your needs and tastes. MSI is a well-known brand in the graphics and mainboard market, but certainly isn't my first thought when it comes to cases. We have seen one other offering from MSI this year in terms of a budget case – the Raptor. It reviewed fairly well, which makes us a bit curious as to what a mid-level offering will bring.

Product Name: **MSI Ravager**

Review Sample Provided by: **MSI**

Review by: Jakob Barnard

Pictures by: Jakob Barnard

Case Type	ATX Mid Tower
Material	Steel

Message	<p>The reviews are really hard to read due to the light grey background with the dark grey letters. Kinda the same with this screen that i'm posting on. Why a grey background at all? is that a universal thing you can wipe out whenever there is going to be text to read over it?</p>
